① History of Town of Hanoi

The Town of Hanoi is a famous

mathematical puzzle invented by the

French mathematician Edouard Lucas in

1883.

According to a popular legend, there is

a temple in India with three golden

rods and 64 golden disks. Monks

continuously move the disks following

specific rules. It is said that when

they finish moving all 64 disks, the
world will end. This story was passed
by word to word the people were
terrifying.

Explain: 1) Only one disk can be moved

- or a three disk tower be placed
- 2) A large number of disks can be moved.
- 3) Only the top disks of any rod can be moved.

19) A. Data structure

- 1) Women arranged on a shelf.
- 2) Women kept in my bag
- 3) students waiting for the college bus
- 4) Roll numbers in the attendance register
- 5) students sitting in classroom rows
- 6) Contacts searched on my phone
- 7) Playlist making from one song to the next.
