

~~Q~~ What are various problems you observed
in society & community, pick any 5 problems
Find out if they can solve using DSA.

1) Parking slot finder - Array, searching
Quickly finds an empty parking space in a parking area.

2) Queue Management in Hospital - Queue
Manages patients in the order they arrive, reducing confusion.

3) Lost and found item search - Hash table
Stores lost items and allows fast searching by item name or ID.

4) Student Attendance Management - Hash table, Array
Stores attendance records and quickly checks whether a student is present.

5) Bus stop waiting list - Queue
Maintains the order of passengers waiting to board the bus.
